

Woodland Newsletter

June 2018

Message from Principal

Hello Families,

Our second whole school field trip will take place on Thursday, June 14th when all Woodland students, teachers and staff will board eight yellow buses on our way to the Boston Children's Museum. While at the museum, the Kindergarten and First Grade students will participate in KinderKEVA. During this program, the students will engage in design challenges that build skills in engineering, executive function, communication, and teamwork. Small groups of students will circulate through a series of KEVA plank design challenges. These challenges promote creative problem solving and develop varied skills.

The Second and Third grade students will participate in the Balls and Tracks program. During this program, the students will work in groups to design their own unique Raceways track. The students will be the engineers as each team of students designs a roller coaster track. In addition to putting their problem-solving skills to work, students will practice teamwork. These challenges will encourage the students to apply concepts of engineering and design, as well as, utilize the scientific method to observe the marbles' movement and behavior.

On the field trip day, please remember to be on time for drop off because we will board buses promptly and have your child wear their Woodland t-shirt, Weston gear or maroon to show their Woodland spirit in Boston!

Sincerely,
Jennifer G. Faber

Thank you!

On behalf of the Woodland Faculty and Staff, I thank you for all your dedication to supporting the teachers and programs, volunteering for anything and everything, as well as, trusting us with your children. It is an honor that your children are part of the Woodland Family!
