November 11: No School (Veteran's Day)

November 17: Field Principal Coffee (9:00 AM)

November 22: Field Picture Retake

November 23: Early Dismissal (11:00 AM)

November 24-25: Thanksgiving Break

PTO & WEEFC Announcements

Hello Field School Families,

It was great to see so many of you at Friday's Trunk or Treat. We had a record turnout for the event, and we hope your families had as much fun as ours did! Thanks again to the families who contributed to making it such a festive and successful evening.

Our next big elementary community event will be our Multicultural Fair on Thursday, January 26, 2023, from 5:00-7:00pm at Field School. Mark your calendars now because the New Year will be here before we know it! We hope you will consider getting involved in the much-anticipated return of this special event. We are looking for volunteers to (1) host a booth representing a culture, country, or region; this is the heart of our multicultural fair. Feel free to partner with other members of the elementary community with whom you share a culture, country, or region to co-host a booth! We will also need volunteers to (2) assist with: a) set-up before the event; b) clean-up at the end; c) work a shift during the event; and/or d) help prepare materials leading up to the fair. This event relies on the help of volunteers, so we encourage you to reach out to us if you are interested in participating. You can contact us directly to volunteer, or be on the lookout for communications from your Room Parents in the coming weeks.

Thank you for all of your support!

Best,
Laura Wilson & Taylor McIntire
Field School PTO Co-Chairs

From the Principal

Dear Field Families:

I hope this message finds you doing well and enjoying the fall weather! It's hard to believe it is already November. I am writing to share some details about our new Field Innovation Center and some information about K-5 curriculum. I am happy to share that the new Field Innovation Center is up-and-running! As you may know, Field School received generous funding from WEEFC to build a state-of-the-art makerspace full of coding equipment, 3D printers, laser cutters, furniture, and construction equipment. I am proud to share that all students at Field school have already used equipment from the space as part of our library/technology and science classes. Fifth grade students utilized Root Coding Robots to better understand moon and sun movement patterns. Our fourth graders developed an understanding of how 3D printers work by printing out rudimentary three dimensional objects. Students will continue to develop key 21st century skills by participating in hands-on learning activities in the Field Innovation Space throughout the year. At the end of the month, I will advertise upcoming coding and innovation lab clubs, which will use the space before and after school.

On a different note, I want to share some information about how you can access information on what learning standards are covered at each grade level across K-5 subjects. To access this information, please click on the link below and select the subject/grade level that interests you most.

https://www.westonschools.org/curriculum/curriculum-standards/

The school district is offering a series of K-5 forums that focus on each subject in detail (click here for more details). As always, please feel free to reach out to me anytime with any questions you may have, or just to check in!

Dr. Green
