June Academy 2023 - Course Catalog

AM Courses List

The Amazing Race - FULL DAY COURSE
An example of a challenge would be to have students find their way to two different locations and complete a task at each location using only public transportation (no uber). Students taking this course need to be able to get to a T station on their own (the closest location of the T in Weston is Riverside). Once they are there, an unlimited T pass will be provided for the week.

Backyard Birdles - exploring the birds and turtles all around us
Kayak on the Charles, hike the local preserves, and visit the Harvard Museum of Natural History in search of today's living dinosaurs. Not all dinosaurs became extinct. They live with us in great abundance in our own backyard - the birds and the turtles! We will connect with experts in the field and learn about the wonders of our local turtles and birds! We will have guided walks in local habitats that foster turtle and bird species. You will learn to identify local turtle and bird species in our area and some behaviors that help them survive today's changing landscape and climate. **$60 Student fee***

Beautiful Morning Hikes
Enjoy the great outdoors and get some exercise! What could be nicer than hiking for an hour or two on a beautiful June morning? We will visit a different park or reservation each day and will have a chance to learn something about each of them. Hike lengths of 1 to 3 miles. Closed-toe shoes required. Participants will learn to follow a blazed trail and gain an appreciation of the natural beauty of Weston and surrounding towns.

Beautiful Storage
Students in this course and I will rehabilitate the storage container used by Theater Company and by the Sophomore class for Haunted House materials. We will paint the container in Weston colors (Prep, prime, paint), add mural(s) (Weston Wildcat, paw print, School seal), and make improvements to the inside of the container (raising the stored items off the ground with flooring/pedestals).

Beyond Newbury Street: Neighborhoods of Boston - FULL DAY COURSE
What is Boston other than Newbury St, Fenway Park and Beacon Hill? What are some new neighborhoods we can discover? And who are the people that make up these communities? Boston, made up of diverse neighborhoods with a lot to offer, is much more than the Back Bay and Beacon Hill. Come explore new places and see all they have to offer. We will visit neighborhoods such as Chinatown, Roxbury, Dorchester and East Boston to learn about these vibrant communities. Part of the field trip will include an opportunity to try new foods from different cultures, so come ready to get to know new places, people and cuisines!
Students will learn about and appreciate different cultures and cuisines by exploring neighborhoods of Boston that they may not have previously visited. **$17 Student fee***

June Academy 2023 - Course Catalog

Civil Rights Tour of Greater Boston - FULL DAY COURSE
This course will explore various aspects of the history of civil rights in the Greater Boston area. Combining classroom based discussion featuring guest speakers with field trips to historic sights and resources, students will understand several different areas of civil rights. Sights visited will include The Wampanoag Experience at Plimoth Plantation; Parallel Lives-Life and Work on a Northern Plantation--The Royall House & Slave Quarters, Medford MA; The Black Heritage Trail & The Museum of African American History, Boston, MA; The Asian American Experience in Boston. Students will understand the civil rights journeys and histories of several groups in the Greater Boston area. **$56 Student fee***

College Tours - FULL DAY COURSE
This June, join us as we visit an array of colleges and universities in the Boston area during June Academy! This program will incorporate day trips to a variety of schools -- private and public, large and small, urban and suburban, to give students a taste of different college atmospheres. Students will go on school-led tours, have the chance to walk around the campuses, and explore the surrounding areas to get a glimpse of various school experiences. Previously we have visited Tufts, Boston College, Northeastern, Providence College, and Bentley.This year's final itinerary will be determined closer to the start of the course. Students must travel both ways with teachers and the rest of the cohort. Space in the program is open to freshmen, sophomores, and juniors interested in learning more about the college experience.
$10 Student fee*

Disc Golf
Find out why disc golf is one of the fastest growing sports in the world. This course will introduce the basics of the awesome sport of disc golf including driving and putting, disc selection, and the rules of play. (Rule #1: Have fun!) After developing our throwing distance during "field work", and figuring out our shot shapes in Wildcat Woods, we will learn how to play in a tournament. On the final day we will travel to and play a beautiful course in Easton, Borderland DGC. **$35 Student fee***

Farming to Benefit the Community
If you love visiting farms, backyard animals and supporting local food systems then this course is for you! We will tour different farms that are right in our backyard. Go behind the scenes and learn from area farmers about the benefits of Community Supported Agriculture, animal husbandry, and why local farming and food systems are so important to the community and the environment. Students will be able to discuss what is involved in running a CSA at a local farm. They will understand the process of raising chickens and pigs on pasture for meat. In addition they will learn about community farm plots and how those with food insecurity can benefit from local farms. **$33 Student fee***

Fishing at the pond
Students will be taught fishing techniques with a variety of artificial baits (lures). They will also become familiar with various types of knots, fishing equipment including rods and reels, line types. Students will practice techniques in the classroom and around the pond. Students will need to provide their own fishing rod and lures. I do have 2-3 extra rod/reel set ups for borrowing. They will have the knowledge to be able to set up their equipment, tie basic knots and fishing techniques.

June Academy 2023 - Course Catalog

Geography, Exploration, and Technology
In this course students will explore the world using different technologies as they relate to geographic learning. This could include Google Earth, 360 photography, ERSI StoryMaps, OpenStreetMap, geocaching, and orienteering. Take action by annotating satellite imagery for an environmental cause. Come excited to experiment with new technology and explore the world around you. Some class time will be spent outdoors/in the local environment."
Students will be able to use/explain three different technologies they could use to explore their local environment (compass, geocaching, satellite imagery).

Harry Potter: The Wizarding World of June Academy
Calling all Muggles and Wizards! The Wizarding World of Harry Potter is a course designed for fans of the Harry Potter novels and film series. We will examine the series as it relates to pop culture and education. In the course, students will discuss the books, watch some of the HP films and engage in fun games and activities related to the HP series. Be ready to board the Hogwarts Express this June for a magical experience! My goal is for students to engage with reading for enjoyment, discussing texts with peers who also enjoy the HP series, and make important connections between literature and pop culture.

History of American Professional Football
The National Football League is the most popular professional sports league in the United States by a wide margin. But that wasn't always the case. When it was founded in 1920 the league had to fight hard to find its place in American Culture. Through battles with college football and other professional sports leagues (including other professional football leagues) the NFL was able to weather the storm and develop into the billion dollar corporation we know today. Come learn how this league was able to stand the test of time and rule the sports world. This course includes learning the X's and O's of the game and on field competition!

Introduction to Podcasting
Are you a fan of the true crime podcasts of Karen Kilgariff and Georgia Hardstark? Do you listen to Joe Rogan’s podcast? Do you wonder what it takes to create a podcast? In this JuneAcademy podcasting course students will share their favorite podcasts, identify elements that make a successful podcast, assess podcasting software, and then create a podcast.

Jane Austen Book Club
If reading a Jane Austen novel sounds like a lovely way to spend four June mornings, then this is the course for you. We will head back in our minds to 19th-century England, and, if weather allows, we will head outside to read in the shade in 21st-century Weston. No prior experience with Jane Austen is required.

Knitting and Crochet: The Basics
Explore the creative world of knitting and crochet at your own pace! In this course, students will be introduced to the world of needlework including the basics of knitting and crochet. Students will have the chance to work on a knitting or crochet piece of their choice, at their own pace.

June Academy 2023 - Course Catalog

Supplies will be provided. Students with knowledge of knitting and crochet are also encouraged to participate in this course. Students can begin a new project or continue working on an ongoing piece.

Lifeguarding - FULL DAY COURSE -
Want to be a Lifeguard? Learn the skills necessary to become a Red Cross certified lifeguard. This course will provide entry-level participants the knowledge and skills to prevent, recognize and respond to aquatic emergencies and to provide care for breathing and cardiac emergencies, injuries and sudden illnesses until EMS personnel take over. The prerequisites of the class are: Minimum age: 15 years; must swim 300 yards continuously; tread water for 2 minutes using only your legs; swim 20 yards, then surface dive to a depth of 7 to 10 feet to retrieve a 10-pound object and return to the surface and swim 20 yards on the back to return to the starting point. Upon completion you will receive your Red Cross Lifeguard certification which can be used for employment at pools, beaches and camps. There is a cost to participate in the course that will cover materials and certifications. **Student Fee Required (payable to Weston Recreation Department)***

Music Camp
In this June Academy Course, performing arts musicians will get a taste of what it's like to attend a summer music camp. Students will engage in...
- Audition Preparation
- Chamber Music
- Music Theory
- Conducting

Students will also take a Field Trip into Boston! **$10 Student fee***

Myths and Mirth
Ancient Roman Fun and Games Epic heroes. Angry gods and goddesses. Mythology has been used since the first people gathered around the fire as a way to make sense of humankind and our world. This course focuses on the Greek and Roman myths and legends they used to explain their world. You will learn and share about the major gods and goddesses as well as heroes and monsters. Students will be able to explain some of the foundation myths of Greek and Roman society. Students will be able to identify how mythology still affects our culture today.

Pave the Way to Understanding: A Tour of Local African-American History Sites, Trails, and Walks - FULL DAY COURSE
Explore local African American History sites, trails, and walks while learning about their importance and deepening your knowledge of the African American experience in New England. We will visit museums and take tours in Boston, Concord, Brookline, Medford and even Portsmouth, NH. Students interested in this course should be prepared to walk approximately 3-5 miles each of the days of the course. **$53 Student fee***

June Academy 2023 - Course Catalog

Physics and Contemporary Issues
Students will read the book "Physics for Future Presidents" and learn to apply a scientific perspective to the important global issues facing the humankind. The topics include energy production, climate change, terrorism, surveillance, artificial intelligence, weapons of mass destruction, etc. Each student will conduct own research to create a presentation on an issue of interest.

Play Like a Kid
For this June Academy class, you will be asked to focus on playing like you did when you were young. We will reintroduce you to the joys of crafts, games, and spending time outdoors while building in time to discuss why this kind of play is important as you grow up. Our plan involves some indoor play and crafts, some outdoor activities, and some off-campus time “playing” so you can explore a variety of child-like fun. If you’re interested in babysitting, working as a camp counselor, or just looking to embrace your inner-child, this class is right for you. **$48 Student fee***

Science in Action: Real World Experiences - FULL DAY COURSE
Over the course of June Academy our class will visit various venues to see how science is done in the real World. We anticipate visiting a research science laboratory (chemistry/genetics/biology), hiking up to the Blue Hills Weather Observatory, visiting the Planetarium at the Museum of Science, and a possible trip to the Boston Aquarium. **$69 Student fee***

The Poetry of Taylor Swift
Taylor Swift is one of the most celebrated musicians of this generation. In this course, we'll study poetic devices and forms through Taylor Swift’s entire discography. We will investigate rhyme scheme and meter, metaphor and allusion, imagery and repetition, all while listening to one of our favorite artists. Students should be prepared to let loose their inner Swiftie as we debate our favorite TS albums, songs, and all-things Taylor related.

Ultimate Frisbee
Ultimate Frisbee is a unique team sport, yet offers lessons in transcendent field sport strategy, gamesmanship and sportsmanship. Using Ultimate as ground central, we will expose the roots and development of effective play in nearly any field sport (as well as what sport offers the individual and the collective). Ultimate combines the best of soccer, football, basketball and other field sports. Effective strategy in Ultimate demands both predictable and unpredictable use of space. Students in this course will study successful use of space, along with the applicable physics and geometry. In addition, students will learn the Spirit of the Game, a principle that governs all play, essentially supplanting the need for officiation by referees. Come see how Ultimate combines the best of other field sports, and how it offers lessons in gamesmanship and sportsmanship.

June Academy 2023 - Course Catalog

Web Design and Development
This course will introduce you to the fundamentals of web-based development/coding. You will study and seek to replicate applications like Facebook and Instagram and Conjuguemos. You will be working in the following web-based languages: HTML, CSS, Javascript. Summer-time coding... should be fun! Be able to create functioning webpages in the style of popular social media apps.

Wilderness Survival
The focus of this course is developing skills that will increase your chances of survival in the wilderness should you become lost. Many of these skills could also be implemented in an apocalypse situation. Among other topics, we will cover sheltering basics, fire making, food safety, water safety, first aid, orienteering/land navigation, and wilderness preparedness. Students should be prepared to go outside every day of the course, rain or shine.

PM Courses

Beads and Baubles: The Art of Jewelry Making
Would you like to create your own beautiful jewelry? Jewelry making dates back thousands of years and crosses many continents, with a rich history in personal adornment and symbolism. In this course, we will explore different types of jewelry making and students will bring home their creations! Students will use beads to create colorful bracelets, melt crayons to create unique earrings, and polymer clay to create an item of their choice. We will also explore the use of Henna as a way of creating beautiful jewelry-like designs.

Board Games
Students will learn to play new board games requiring different strategies and social skills. Players will be expected to expand their comfort zones by playing games they have never played before. Play Avalon: The Resistance, Sentinels of the Multiverse, Settlers of Catan, Ticket to Ride, Code Names, Pandemic. Students may also bring in games from home with approval of the instructor.

Creating Outside the Box
Students will be provided a variety of sources (poems, song lyrics, instrumentals, etc.) and will discuss how to create imagery and artistic expressions of these sources in a variety of ways. Students will have the opportunity to push their creativity with experimental methods of making art from revisiting the joys of fingerpainting, crayons, colored pencils and shaving cream, in a completely new light. Think: Melted crayon art, paint balloons to canvas, and so much more.

Doughnuts around the world
Explore the science and joy of making doughnuts from around the world. from beignet of france, churros of spain, sfenj of north american and balushahi of nepal, doughnuts start with a dough that is mixed, formed, aerated then fried. this class will explore the skills need to make a yeast dough, forming and shaping, frying and glazing. students will have an opportunity to design their own signature donuts. time management, group work, learn to mix and shape doughs, use a scale, introduction to different types of flours, frying in oil & butter, design

June Academy 2023 - Course Catalog

Floral Design with Foraging
Do you enjoy walking in the woods and gathering items from nature? Do you enjoy making flower arrangements? Do you want to learn how to include items from nature in floral designs for centerpieces or small bouquets to brighten your day? We will learn floral design using items from nature and commercially available flowers. We will consult with experts in the community, and we will deliver some arrangements as acts of kindness to people around our community. Check out "The Big Flower Fight" (Netflix) and "Full Bloom" (HBO) for ideas and be ready to be creative!

Globalization of East Asian Foodways
This course will explore how globalization has brought food cultures and foodways from Asia to the United States. Besides exploring some of the history behind the synthesis of food culture, we'll have an opportunity to explore different foods through the lens of global marketing, and food trends that have been influenced in recent years by food celebrities, and influencers, and explore the impact of those on our own culture. Finally, we'll have a chance to explore an Asian grocery store and restaurant in Chinatown to connect how global migration has also impacted food culture and foodways in America.

Grilling, Games, & Galore
Do you want to learn how to marinate and grill a variety of foods and appetizers? Do you like games and having fun? Then Grilling, Games, & Grins is the June Academy Club for you! Each afternoon we will prepare and grill different foods as well as play different organized games which can include kickball, wiffle ball, flag/touch football, soccer, cornhole, ladder ball, and frisbee. You will learn how to create your own marinade for meats, prepare fun appetizers, and cook on a grill. This will take place on the softball field behind the school where there is plenty of sunshine and shade. Our learning goals for students are to be capable of independently creating and grilling delicious dishes for both themselves or a group of people. Students will also learn the ins and outs of grilling (i.e., what is required to set up and start the grill, when to flip food, safety procedures of grilling, and cleaning/putting away of grill and space). **$40 Student fee***

History Book Club: Women and the 1930s
If you like to read and if you like history, come join this book club! You will choose the book you want to read from the selection (or even read the same title with a friend) and spend the June Academy session reading as much of it as you can. Weather permitting, we will go outside, so bring a blanket or a beach chair. All of the selected titles are about women in the United States during the 1930s, but you do not need to know much about the decade to understand the history and/or the stories.

Introduction to Dog Training
The Council for Certified Professional Dog Trainers provides guidelines and best practices for ethical dog training that many trainers across the country follow. In this course, we will learn about these methods and how to apply them with our own animals. We will start by learning more about dog body language and behavior, and then continue on to the different methods for

teaching dogs tricks and behaviors. Don't have a dog, but have cat? The methods still apply! Cats can be trained too! Additionally, we will be able to Zoom with a full-time professional animal behavior consultant and trainer to ask questions and learn more! Students will learn about operant and classical conditioning and also how to choose methods for teaching animals (mostly dogs) certain behaviors. If they have a pet at home, they will able to try these methods for themselves.

Intro to Italian
An introduction to one of the most beautiful and lyrical of all languages, this course will center on practical vocabulary taught thematically through role-play and online tools. Some grammar will be added to ensure a basic level of communicative proficiency with the goal of providing students the wherewithal to get by in a variety of common first time travel scenarios: restaurant, train station/airport, hotel/hostel, taxi cab, police station, hospital vocabulary as well as asking/understanding directions will be much of the course content. Ideally they'll be able to manage themselves in Italy within the themes mentioned above (restaurant/train station/airport etc.)

Latin American Music and Zumba
Join us to learn about some Latin American Music and to enjoy them while learning to do Zumba. We will watch videos, listen to music, and do our best to follow the rhythm with our body. If you like to have fun with music, this is for you! Students will listen and be familiarized with some music rhythms from Latin America. Students will be able to distinguish some of the most popular music rhythms from Latin America. Students will be able to follow the rhythm of the music while doing Zumba.

Fly Fishing for Life - all are welcome, from beginners to experts
Fly Fishing is a beautiful and rewarding, lifelong sport.
(Check this out! https://www.youtube.com/watch?v=UO9CsewiMH8)
It's an angling method that uses a light-weight lure - called an artificial fly - to catch fish. The fly is cast using a fly rod, reel, and specialized weighted line. As you get better and better, it becomes an art form. In choosing this course, you will learn various techniques, fishing tactics, how to tie your own flies, and watch videos of some of the best anglers catching fish from all over the world. Outside, we will practice our skills on a nearby field and then set out to local bodies of water to catch a variety of fish, including trout, bass, and sunfish. Learning the basics of casting is sometimes a challenge, but all you need is patience and determination (and a fly fishing license… https://www.mass.gov/how-to/buy-your-freshwater-fishing-license) Join us!

Mending and Hiking
Do you have a favorite sweatshirt, t-shirt, blanket, or other textile that you have loved to death (rips and holes) and want to revive and restore with creative and visible mending? Join us for quiet, contemplative mending sessions with built in hiking breaks. We'll supply the needles, yarns and threads and examples of what you can do. You'll bring your items to mend and wear good shoes for walking. Students will learn how to mend clothing and other items to reduce

consumption and live more sustainably. Students will experience extended periods of quiet time involved in their individual tasks. Students will take movement breaks with a couple of planned hikes.

NASA in the Movies
Space exploration and NASA have been the themes of many films. We will watch three films, two historical, one futuristic, and examine how issues of race, gender, inclusion and equity have changed and hopefully will continue to impact space exploration and those who do it. The films we will watch are Apollo 13, Hidden Figures, and The Martian. On the fourth day you will create and present a Bento Board or a Mood Board with your reactions to the themes of the three films. Students will understand that women and minorities have historically participated in space exploration even if they were not visible at the time.

Running Club
Come run with us! No experience needed! Great for beginners and veterans alike! We are going to be exploring what it means to run, and finding your why to keep you motivated. Will be incorporating longer runs, track runs, as well as some body weight and strength training, how to warm up, cool down, stretch, prevent injuries and refuel yourself! Proper attire, running shoes, water, changes of clothes will all be necessary.

Quilting as Art, Quilting as Craft
Explore the history of quilting as an American tradition through the hands-on experience of hand-sewing a quilt from start to finish! Students will explore the history of quilts and quilt making in the United States, quilting as a community activity, and sustainability practices as a source of inspiration. Students will apply this knowledge and understanding to create a hand-sewn, heirloom-quality quilt to be displayed at Weston High School.

Shark Tank
Have you ever wanted to be a part of ABC's Shark Tank show? Well now you have your chance! You will be coming up with a Business of your own. Before you pitch your business to the Sharks (TBD) you must complete a variety of tasks.

Songwriters' Seminar
Do you like writing songs? Are you a musician who has thought about composition but has never known where to start? In the Songwriters Seminar, each student will work either individually or in a small group to produce an original song, complete with lyrics, melody and harmonic progression. We will critique and give feedback to one another on our song ideas, and at the end we will record everyone's compositions! Some musical training or background required. Students will have the experience of writing an original piece of music. By the end, they will have recorded their song (or partially completed idea).

Teamwork and Collaboration in Video Games
Students will engage in active discussions of strategies in multiplayer games. These strategies will go over being a good teammate, situational awareness, resource management, and disadvantaged play. Students are expected to bring a platform to play on (PC, xbox, switch, ps

etc.). The concepts discussed will apply to most competitive games but we will be showing them in free to play games such as CS:GO, Valorant, Rocket League, etc. If you would like to discuss other games, please email me with any requests: boardmans@weston.org .

The Show Must Go On!
Do you love musical theater? Do you dream about being the next Patti LuPone, Audra McDonald, or Lin-Manuel Miranda? Want to practice your audition skills or prepare for an upcoming audition? In this course, students will explore Musical Theater by learning scenes, music, and dance numbers from various eras. They'll study Broadway's effect on society, and vice-versa, as well as the evolution of the art form from origins to present day. Students will practice audition techniques, build portfolios, and create solo and group performances pieces, among other activities. Pending ticket availability, students will also have the opportunity to attend a live musical theater performance. **$6 Student fee***

The Joy of Learning and Knowing Trivial Things
Even in the age of Google, having bits of (sometimes trivial) knowledge in one's head can be useful and fulfilling. This course allows students to spend time learning content from some of the subjects that frequently appear in trivia contests (e.g. geography, literature, history, recent events) and then show off that knowledge in various competitive formats. Students will have some choice about which topics they want to specialize in. Every student will master a core of basic material in at least four trivia content areas. They will also learn how to use the process of question writing to leverage new learning.

Women in Sports
In this course, we will analyze how gender affects participation in and attitudes towards sports. We will research and discuss topics including the history of women's athletics, media portrayal of female athletes, and current events in women's sports. Students will design and propose an initiative to tackle gender inequality in sports at a community level, and of course, we will get outside and be active!

Words, words, words... Word Puzzles and Games
Do you Wordle? Qwordle? Scrabble? Do you love (or even like) word puzzles of all kinds? This course will aim to provide you lots of time to play word games together, on your own, and perhaps even to design a word puzzle or crossword of our own. We'll look at the development of word games as a form, the explosion of them recently through Wordle and other games, and how understanding the roots of the English language can aid in playing all of these games.
To develop their understanding of and skills in playing word games.

*Note: Financial Support available for students unable to afford the fee for their course. Contact Mr. Sanford, Ms. Paone, or your Guidance Counselor for assistance.
