Tips & tricks for a smooth Picture Day... COVID edition

Ensuring a smooth and stress free Picture Day is always our goal, and we recognize that the added pressures associated with Covid-19 protocol can make this a challenging thing to achieve.

Here are a few things that your school can do to help make the event run as efficiently as possible:

- Familiarize the teachers and school staff with our Photographer Station Set Up PDF (see attached). This will explain the flow of student traffic as they arrive for photos.
- Explain that any completed paper order forms should be placed in the box our staff puts out at the photography area. The box has a well displayed sign that says "Place Order Forms Here."
- Please have students write their name on a piece of paper to show the photographer when they arrive for their picture. We have found that children, especially those in younger grades, have difficulty projecting their voices to give the photographer their name. This will dramatically speed up the process!
- Remind students that they will not remove their mask until they are standing or sitting for their photo. They should replace the mask immediately following their picture being taken and before they walk away from the station.
- Students should place their mask in an available back pocket or hold it in their hand while being photographed.
- Whenever possible, please ask classroom teachers to assist with crowd control to ensure proper social distance from our photographers and among other students.
