

SCHOOL BUS SAFETY

The Weston School Committee seeks to provide a safe environment for students not only in its buildings and grounds but also in the school buses and any other vehicles used to convey students for school purposes. Accordingly, the Committee directs the Superintendent to establish comprehensive safety protocols for all students, school vehicles, drivers, and transportation-related facilities.

In devising, implementing, and reviewing such programs, the Committee expects the Superintendent to periodically consult with transportation personnel, parents, local and state public safety officials as well as such other persons and agencies that may provide useful resources toward the accomplishment of school bus safety.
