

CLASS RANKINGS

The ranking of students within a high school class shall be permitted for purposes of determining honor students, various distinctions related to high school graduation, and to provide information for college entrance officials. However, the ranking of students within a class shall be considered privileged information, and shall not be posted or published.

At the high school level, a weighting system for marks shall be devised so that students enrolling in advanced and difficult courses will not be penalized insofar as rank in class is concerned.
