

Detection combing

- Prepare by **buying a good quality plastic detection comb** at your local pharmacy
- **Remove tangles** with an ordinary wide-toothed comb
- **Wet** the hair and **towel dry**
- You can **use Lyclear CombAway (wet combing kit)** to make combing easier
- Divide the hair into **4 sections**

Easy steps to detect head lice

➤ Step 1

Work on **one section at a time**

With the teeth of the **plastic detection comb** touching the scalp at the top of the section, **pass** the comb **through to the ends**, keeping it in contact with the scalp for as long as possible

Easy steps to detect head lice

Step 2

After each pass of the comb, wipe it on a tissue and **inspect for lice**

Step 3

Repeat the process until all sections are completed

- it will take 15-20 minutes to do it properly
