Subject: Regarding historical grades and transcripts (from Neil)

Friday, September 12, 2025

Dear Parents/Guardians,

In response to questions about viewing student information, we want to remind you that you are able to view more information in the **PowerSchool Parent Portal using a browser** than you can in the PowerSchool app. For example, grades since the 2021-22 school year are viewable in the browser with the Historical Grades link. You can access the parent/guardian and student portal at this link: https://westonschools.powerschool.com/public/home.html.

As you can appreciate, migrating to a new student information system is complex. We are currently working on the data mapping and formatting of the Weston High School transcript. We hope that this work will be complete by early October. In order to serve the early needs of students communicating with college coaches and requesting early admission reads, counselors will be sending the transcript through junior year, generated by Infinite Campus, accompanied by the list of senior year courses from PowerSchool. Rest assured that the reason for this will be clearly communicated to colleges and will not impact applications.

The Infinite Campus transcript and PowerSchool list of senior courses will be included with the Transcript Request Form provided to students. As soon as the PowerSchool transcripts are available, an unofficial copy will be sent to you through BrightArrow and the PowerSchool Parent Portal.
